LIEFF/1 - 1963 Taxes

1964 1964 Page 1964

- 1. A review of each of the statements ande in reference by LIBNY/1 has been made by Bredquarters. Some of these statements can be used to substantiate a claim that the AUBARK earnings are moo-texable.
- 2. The fact that as employer-employee relationship does not exist is not a basis for determining whether earnings are taxable. Subject is a contract agent-independent contractor; and the payment received by LIENT/1 is considered exceed income. The law (Internal Revenue Code) defines earned income as 'wases, salaries, professional fees, and other amounts received as compensation for personal services actually removered'. Larmed income is excludable if the qualifications of Section yill of the Internal Revenue Code are met. Three of these Qualifications are:
 - A. Berned incom from sources without the U. S.
 - B. Attributable to such eminterrupted period-one complete tex year or 510 days out of as 18 month period.
 - C. Not paid by the United States or say Agency or instrumentality thereof.

" Subject obviously qualifies on (A) and (B), however, LIENT/I does not meet qualification (C), therefore, exclusion cannot be claimed for the income carned from KUBARK.

- 3. If Subject reed IRS Publication So. 5b (Tax Gaide for U. S. Citizens Abroad) it is easily understandable how he could be mislead because they refer to Covernment employees and not to those individuals having an independent contractor relationship with the Covernment. The key point in the Pavence regulations is the definition of cornel income and the fact that carned income is not excludable if carned from a U. S. Government source.
- 4. Attached are photocopies of the Internal Revenue Code and regulations pertaining to the exclusion of income earned abroad.
- 5. Also attached is the 1963 covert tax return which Headquarters has purpared. Please note that lines 17 thru 23 and the Schedule C (lines 6-11) have not been completed. If LIHTF7/1'S overt income has asximum social security (FICA) withheld no celf-employment (social security) tax is computed. If social security is not lithheld overtly then smif-employment tax is computed on the Schedule C and added to the income tax on the Form 1040 (see line 17, Form 1040). The Form 1040 can then be completed, signed, and returned to Headquarters along with the payment for the outstanding tax limitity.
- 6. If a personal check is used in payment of the tax liability it should be prepared in accordance with PMB 20-661-1, Supplement, payments 9 (non of a stational name of the payment).
